

Product Modifications and Additions

AO and SDCF Handle Improvements:

Parts List:

- LV17 – Boot
- LV52 – Straight handle
- LV52G – Bent handle
- S024 – 10-32 1-3/4 S.H.C.S.
- S047 – 90 deg. Handle link
- S048 – 5/16-24 x 1/2 B.H.C.S.
- SF506 – AO/SDCF Handle end-cap
- SF507 – AO/SDCF Seal retainer
- SF508 – AO/SDCF Handle adapter (not shown)
- SF509 – 1/8 x 7/8 Groove pin (not shown)
- SF512 – 5/16-24 Ball knob
- P1305 – 5/16-24 Jam nut

Brand Hydraulics has listened to its customers again, and increased the value of the AO and SDCF by designing an enclosed handle. We've added a vertical "G" and horizontal "C" enclosed handle. These new handle styles are meant to replace the current "L" style handle. We would like to have everyone switched over to the enclosed handle by February 2009. Option "G" and "C" style handles will be available beginning in the middle of July 2008. The list adder for the "G" style is \$3.00 and the list adder for the "C" style is \$5.00.

The enclosed handle functions the same as the "L" style handle as far as feel, travel, and shifting angle. It provides a cleaner look, keeps out contaminants and protects the spool. Please contact us with any questions on the new design.
