Wireless Remote Controls

[About](#) | [Catalog](#) | [Installation](#) | [Electronic Controls](#) | [Distributor](#)

Engineering & Manufacturing Solutions

Brand's V & RP Series was designed to allow for the operation of equipment remotely, improving operator convenience and safety. The V Series transmitters are offered in 2 to 16 buttons. The RP Series receivers are offered in 4, 10 or 16 digital outputs. They are compact, durable, IP65 rated (transmitter), IP67 rated (receiver) and easy to operate.

V Series Wireless Controllers with RP Receivers

Product Features Include:

- Frequency range, 2.4 GHz with extended range and DSSS modulation
- Conformal coated circuit board in the transmitter
- Custom graphics available
